

EBT at the Farmers Market

Several farmers markets and farm stands across the state are now accepting SNAP benefits (formerly known as Food Stamps). To use these benefits at a market, a recipient would first visit the information booth and run their Quest card for the amount they want to spend. They would receive market tokens for that amount which can be spent on any SNAP eligible foods being sold by any participating vendor at the market.

All markets and farm stands will be hosting Match Days, when Quest users get **double their money** for fresh, local food. A market will provide double the amount of market tokens and a farm stand double the amount of produce, up to the first \$20 spent with a Quest card on a Match Day.

M1= Match Days at the 1st market of the month

MTS= Match Days throughout the summer until funds run out

Markets open twice a week will offer matching on both days
